Leadec Hungary: on the pulse of industry for 30 years

Stuttgart/Germany, Győr/Hungary, 06/05/2024 - Congratulations, Leadec Kft.! Leadec has been active in Hungary for 30 years and supports the industry with specialized services for the factory. Digitalization and sustainability are playing an increasingly important role.

“When Leadec Hungary was founded, the company had a vision: to become the backbone of the industry through tireless dedication and outstanding teams. Three decades of continuous growth have made this vision a reality. Thank you to everyone who has contributed to this incredible development: our dedicated employees as well as our loyal customers and partners,” said Markus Glaser-Gallion, CEO of the Leadec Group, at the ceremony in Győr.

From humble beginnings, a success story was born. A small team took on the first customer contract in Győr in 1994, at that time still under the name Hörmann Győr Kft. Today, the Hungarian market leader for industrial services employs around 900 people and is represented at nine locations: Győr, Kecskemét, Szentgotthárd, Cegléd, Szeged, Makó, Szombathely, Debrecen and Budapest. In 2023, Leadec Hungary acquired the renowned automation specialist FISS Automatika Kft. and thus strengthened its local presence in all major industrial centers.

Services for all aspects of the factory

The services of Leadec Kft. cover the entire life cycle of a factory. This includes electrical and mechanical installations, technical facility management, production maintenance, logistics and technical cleaning as well as production IT, automation, machine relocations and infrastructural facility management. Customers include companies from the automotive industry as well as the cell, semiconductor, chemical, pharmaceutical and oil industries.

Customers in Hungary place great importance on digitalization and sustainability. “With our technical expertise and digitalized services, we are not only setting standards, but are also actively shaping the future. Sustainability is a particular focus for us. We offer solutions for decarbonization and environmental protection, helping our customers to achieve their sustainability goals,” explains Ferenc Dákai, Managing Director of Leadec Hungary.

About Leadec

Leadec is the leading global service specialist for factories across their entire life cycle and related infrastructure. The company, which is headquartered in Stuttgart, generated sales of EUR 1.24 billion and employed around 23,000 people worldwide in 2023. Leadec is based at more than 350 sites, often directly at the customers' plants and facilities, supporting them along the entire production supply chain with more than 60 years of experience.

Leadec's global services comprise: Engineer (Production Planning & Optimization, Automation and Production IT), Install (Electrical Installation, Mechanical Installation and Relocation), Maintain (Production Equipment Maintenance and Technical Cleaning), Support (Technical Facility Management, Infrastructural Facility Management and Logistics) as well as other local services. The digital business platform Leadec.os offers an end-to-end solution which digitizes all service processes across systems.
